

Notes Management System

Position: Full Stack Developer

Frontend Technologies: Angular 9

Backend Technologies: PHP Laravel

Using PostgreSQL database.

The **Notes Management System** will allow the users to manage their notes, by creating a user interface of the following functionalities:

- add note
- edit/ update note
- add/attach a cover photo for the note. (show a default cover photo when the user does not have one.)
- delete note
- view notes (with cover photo)
- search for a note (by name)
